DETAILED ACTION

Allowable Subject Matter

1. Claims 10-18 allowed.
2. Claims 3, 4 and 6-9 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 2 and 5 rejected under 35 U.S.C. 103(a) as being unpatentable over Shiota (2002/0142586) in view of Nakashima et al. (6,639,015).

Regarding Claims 1, 2 and 5, Shiota discloses a method of forming dual damascene structure where in paragraphs 22, 23 and in claim 9 it discloses a coating composition for production of insulating film comprising an organic polysiloxane, an organic solvent and water. Shiota fails to disclose the required ratio for the polysiloxane and the organic solvent. However, Nakashima et al. disclose a coating liquid for forming a silica containing film with a low dielectric constant where in claims 1, 4, 11, 12 and 16, the required ratio for polysiloxane and the organic solvent is disclosed.

It would have been obvious to one of having ordinary skill in the art at the time the invention was made to include the required ratio for polysiloxane and organic solvent

Art Unit: 2826

in Shiota as taught by Nakashima et al. in order to have a semiconductor device with increased reliability.
